STOP MOTION ANIMATION

(SAM ANIMATION SCHOOL LICENSE)

Product Description

Tell your story with stop-motion videos using SAM Animation, which was built specifically for students and teachers. A simple, user-friendly interface enables students of all ages to visually express their ideas within minutes. Easily snap images frame by frame, add narration and background sounds, make time-lapse movies, edit with paint tools, then share direct to YouTube and other video sharing sites. The school license is a one-time fee for installation on any number of computers in a building.

SAM Animation is a desktop software with roots in National Science Foundation research at Tufts University, providing an intuitive method for students to express their ideas and develop understandings across all content areas.

Students are given the opportunity to:

- *Create with their hands*
- *Engage w/effective technology*
- *Work in teams*

In doing so, they gain an increased understanding of the content at hand. Students are encouraged to slow down, process, and create – and that’s where the learning happens!

iCreate is founded on the basis that students have creative ideas, and the technology already exists to unlock these ideas — it’s just a matter of designing the technology in a way that is affordable and attainable for teachers and parents, which we believe we have accomplished with **SAM Animation**.

SAM includes:

- **SAM CD-Rom (single user license)**
- **Teacher’s Guide/Activities CD-Rom**
- **Web Camera**
- **Animation materials: LEGO Bricks, Clay, Color Paper, Oslo Paper, Scissors**
