## SINGAPORE MATH ON-LINE

### Support for Multi-Modal Teaching Strategies

The system provides rich resources to support multi-modal teaching strategies, including traditional classroom teaching, facilitation of cooperative and collaborative learning activities, and accelerated learning.

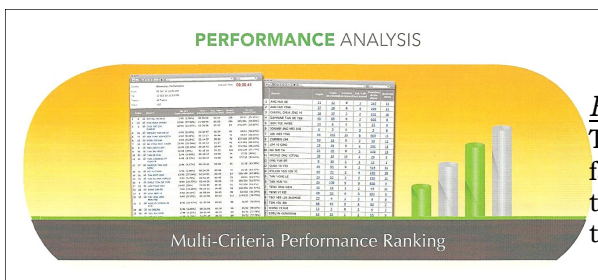

### Unlimited Learning Opportunities

Students who have difficulty following lessons in class, or who had simply forgotten the lessons taught can review the lessons online as many times as they wish at their own pace and convenience. If the lessons were also used by teacher for classroom teaching, the strong link between classroom and online lessons will reinforce students' learning.

### Unlimited Grade Improvement Opportunities

In the case of traditional homework and tests, students' grades are "cast-in-stone". It is impractical for teachers to set repeated homework assignments or repeated tests for the same topic. However, the system empowers teachers with ready-made quizzes as well as automatic quiz generation features which present students with unlimited opportunities to improve their grades by doing more questions at their own time. Teachers can continually monitor and track students' performances for each and every topic.

### Fun For Students

The multi-criteria performance ranking system provides a fun and motivating ambience which motivates students to compete with their classmates or against their own scores and improve their grades.

### **FEATURES:**

- **Real Time Exercises**
- **Random Questions**
- **Each Student has an Individual Account**
- **Automatic Grade Computation**
